

How the project will be evaluated

Item	Points	Comments
Clear objective in introduction	10	Concise statement of problem objective and architecture such as actuator, measurement and controller
Appropriate detail of physical model	10	Physics-based model
Appropriate figure(s) and tables(s) to adequately support results and conclusions	15	Figures: Legends, Labels, Captions highlight important information Tables: Numbers, highlight relevant content
Results and Discussion with appropriate analysis, accurate results, clear logic, and persuasive arguments	25	Qualitatively report controller performance, quantitatively report controller performance.
Clear conclusions and recommendations supported by the data	15	Conclusions support overall objective
Organization that includes appropriate headings	5	Overall organization such as: - Title / Abstract - Introduction / Prior Work Theory - Discussion - Conclusion / Future Work
Quality of communication – clarity, precision, conciseness	10	<i>El proyecto puede ser entregado tanto en español como en inglés.</i>
Grammar, spelling, and appropriate length	10
